

Try things for size and fit

Looking good and feeling comfortable on the road demands the right size clothes. What many forget is that a good fit is also important for safety. Because it's essential for protectors to be located correctly, we secure them with Velcro to allow adjustments to our garments. Also, remember to try on the garments together with the clothes you usually wear when riding your MC. And don't be afraid to ask our personnel for help. The best way to find the right size is to visit one of our dealers. They'll help you find a good fit when you need new equipment.
